

Let KeyArx make the insurance review process as simple as an outpatient procedure!!

Our exclusive **TUSPM Risk Management Review Program** could save you money and quite possibly be one of the most important calls you make for your family. Our review is **no cost** to you. We make the review process very quick, easy and pleasant.

Most people don't think about reviewing their policies until there is a problem or it is too late to do anything. Below are some of the reasons why now is a great time to take five minutes and see how you can save money and strengthen your coverage!

- People are living longer due to medical advancements resulting in a decrease in overall industry insurance costs
- New products have evolved that address multiple contingencies vs. old policy designs
- Your financial situation may have changed since you purchased your policy
- No private or confidential information is needed for the review. You govern the process
- Our Risk Management Review will literally take a few moments on the phone (per insurance policy) for us to get the information we need to perform the evaluation

This is a **complimentary** offering because you are an integral part of the Temple family. It is simple; our entire procedure is completed over the phone and the results are sent to your via email. You determine the next steps and how to move forward. Our results speak for themselves.

Please call Maureen Mcloud at 877.752.3552 or email her at maureen@keyarx.com to set up a quick phone appointment today for the free evaluation.

Sincerely,

Paul J. Cella, ChFC, CLU
